FUGRO PELAGOS, INC. AMONG BEST QUALIFIED FOR 3-YEAR NOAA IDIQ CONTRACT

Fugro Pelagos, Inc. was selected to be among the best-qualified firms to provide LIDAR Hydrographic Surveying and Related Support Services anywhere in the U.S. for the National Oceanic and Atmospheric Administration (NOAA-NOS), a bureau of the U.S. Department of Commerce. Negotiations for the three-year, not-to-exceed \$30,000,000 contract are proceeding.

Fugro Pelagos was selected based on a QBS (Qualifications Based Selection) evaluation for these professional services. Upon award of the contract, Fugro will mobilize their SHOALS-1000T hydrographic LIDAR system to collect data in areas deemed critical to navigation by NOAA. Future operations can include hydrographic LIDAR anywhere in U.S. waters, including Alaska, Hawaii, the Territories and Great Lakes areas. The contract is designed to help alleviate the backlog of charting requirements for updating navigation charts in U.S. waters. It is also expected to complement NOAA's concept that hydrography supports integrated ocean mapping.

About Fugro:

Fugro Pelagos, Inc. is a member of the international Fugro group of companies. Fugro collects, processes and interprets data related to the earth's surface and soil composition and provides advice based on the results. As an extension to these activities, Fugro provides services such as precise positioning, construction materials testing, reservoir engineering and data management. Fugro's operations have been organized into three divisions: Geotechnical, Survey and Geoscience.
